

Moroccan Bus Company Uses CHEMCLAD SC **Safety Yellow** to Create DuraGrip System

Client: International Bus Operation Company

Location: Trial cities of Marrakesh & Agadir, Morocco

Objective: Create a non-slip edge on each step of the test buses. Each bus has a front and back entryway with 3 steps each. Non-slip adhesive strips and other coatings had been tried in the past, but both failed.

Solution: The surface was cleaned with a strong detergent and roughened with a rotary wire brush followed by a second cleaning with solvent. A first coat of CHEMCLAD SC Safety Yellow was applied followed by a locally sourced aggregate to provide slip resistance. A second coat of CHEMCLAD SC Safety Yellow was then applied. There are 2,500 buses to be treated once the trial is shown to work as well as everyone expects.
