

## ENECON Customer Event Includes Tour of Power Plant

ENECON recently hosted a customer event on the scenic shores of a local yacht club in San Diego, CA. Camille Segobia, Regional Sales Director in the area, was joined by Brien Neill, V.P. of Western U.S. Operations, and ENECON's Chilean Distributor, Peter Ottke.

The multi-media presentation given by the ENECON Team covered the latest advances in polymeric maintenance and repair technology.

The open forum permitted the attendees to share their ENECON application stories, as well as learn from each other. Discussions were always lively and productive.

After the formal seminar,

the group enjoyed a V.I.P. luncheon. Following lunch, the group was taken on a unique tour of ENECON applications at a local power plant.

Applications viewed have been in place for many years and included; inlet pipe sections, four feet in diameter by ten feet in length, which were coated and wrapped using ENECON's **DuraWrap Pipe Wrap System** as well as key service water heads that were coated on the interior with **CeramAlloy CL+AC** and the exterior with **ENESEAL CR**.

Everyone in attendance agreed this was an outstanding learning experience.
