

Residential Building Balconies in Canada Resurfaced and Protected with ENECLAD FPS 2000

The owners of this prestigious residential building overlooking the Prairie River in Montreal were looking for a long-term protection solution for their concrete balconies. After investigating a number of high performance coating materials, they selected ENECLAD FPS 2000 to resurface and protect their balconies.

About 100 units of FPS were used on this project which also included the addition of aggregates into the FPS system in order to provide a safety, slip-resistant surface on the balconies.
